

## Wastewater Testing: *Stop COVID Outbreaks Before they Happen*

Wastewater is a critical weapon in the fight against COVID. It detects outbreaks days before they happen, giving you valuable time to prevent the surge.

### How It Works

### Public Health Benefits

Quick Insights into Community Infection Rates

Detects Virus in Symptomatic & Asymptomatic Individuals

Ideal for Communities Where Individual Testing is Under-Used or Unavailable

### We Turn Insights into Action

Wastewater surveillance complements other COVID testing programs and we offer the full spectrum. From PCR to antigen, from broad geographic surveillance to customized wastewater testing for congregate settings. With our pioneering science, nation-wide network of labs, and turnkey testing programs we find hot spots and help you contain them.
