

Community testing site

Host a **COVID-19 community testing site** in your building or outdoor space

Shield T3 can help **keep entire communities safe** by setting up a testing site at a work place or other community location of your choice.

We provide a quick-turnaround, results-oriented, saliva-based testing site set up. Testing services are billed to an individual's insurance or can be paid via credit card.

Shield T3's COVID-19 non-invasive PCR saliva-based tests are easy to administer

About our tests

Results guaranteed **24 hours** after samples are received at the lab (typically 8–12 hrs)

Non-invasive **saliva tests** are easy to collect and FDA EUA-approved

High-sensitivity PCR tests detect all known COVID-19 variants at low levels—before people become symptomatic

Personalized dashboard securely notifies users of their results while maintaining HIPAA compliance

How it works

We partner with a host organization to set up **highly efficient test sites** that meets the needs of the host or community at **NO COST to the host**.

We provide staffing, equipment, and logistics.

Our saliva-based tests are easy to collect, comfortable for users, and are shipped to our nearby labs for quick processing and results reporting.

STEPS

- 1  Provide a sample
- 2  Register a sample
- 3  Sample is picked up and sent to lab
- 4  Results are sent to user

We can work on any timeline and with any space
